Good Morning,

Mr Brown knows the exact location he said he was doing something in the area and said it was dammed. I sent you my KMZ files and it should be North West of my location.

I have a pound / lake on my property that takes in all the water from Boulevard Estates and I think it used to take in some of the water from Tule Creek. I opened all the dams and cleaned out all the culverts that I've found in my area and stopped some of the flooding that happens to Ribbionwood rd, during the flash floods we get. All the water that overflows my property as well as Ribbionwood rd goes to the Tule creek. That would be the Soitec Rugged project.

I've offered the use of the lake to Cal Fire.

I also tried to get help from the San Diego county Public Works Department for the flooding that happens as a result of water run off from county roads Ribbionwood rd and Opalocka. Mr Hebert from County told me he would not look at our problem. It was our problem and not his. Looks to me as if County has diverted its water to our private rd that makes it's way to the Tule Creek via Ribbionwood Rd. Again that water all ends up in The Rugged Solar project. I hope Soitec is ready for all the water they will get.

Can you also add this to the record

Thank you

Wayne

Thank you Mr. Skains,
I'm checking on whether the County has any current violations on Tule Creek in your area. Do you have a more specific location of where Tule Creek is dammed?

Mr Hingtgen

I will try to keep it to my five main concerns. Water, Roads, noise, property value and looks. I moved once and I'm not moving again because of solar. I'm a retired firefighter and I have to be here for the whole build out.

Mr Brown informed me that the Tule Creek was damned can the land owner do that do that?

Thank you
Wayne

Thank you Mr. Skains,
I will add both to the project record. There are no stated limits; however, I recommend that you make your comments as specific as possible regarding the analysis contained in the Draft PEIR and technical appendices.

Thanks,

Mr Hingtgen,

Please add both. I have no limits as to what I add up to the 17th do I?

Thank you
Wayne

Hello Mr. Skains,

Please confirm whether it is your intent to submit the article written by Dr. Ponce dated November 13, 2013, as comment on the Soitec Solar Development Draft PEIR and appendices that were released for public review on January 2, 2014.

Thank you,
